SCRIPT 1 OF 5

Check Your Plate Before You Change Your Workout

Educational · Authority angle

FORMAT	LENGTH	CHANNEL	DM KEYWORD
Educational	35-45 sec	Instagram Reels	PROTEIN

01 THE HOOK

“If you're training hard and your body still isn't changing, look at your plate before you look at your workout.”

02 CORE MESSAGE

Most adults I meet eat plenty of food and not nearly enough protein. Coffee for breakfast, a sandwich at lunch, and the only real serving of protein shows up at dinner.

Protein is what your muscles rebuild with after you train. It also keeps you full longer, which is why people who eat enough of it usually snack a lot less.

I'm Sam, owner of Iron Bird Fitness. The first change I make with almost every new client isn't the workout. It's a real portion of protein at every meal, not just the last one.

Train hard, eat like it matters, and the work you're already putting in finally starts to show.

03 CALL TO ACTION

“DM me PROTEIN. I'll send you the simple way we hit it at every meal.”

SCRIPT 2 OF 5

Crunches Won't Burn Your Belly Fat

Educational · Myth angle

FORMAT	LENGTH	CHANNEL	DM KEYWORD
Educational	30-40 sec	Instagram Reels	CORE

01 THE HOOK

“If crunches burned belly fat, everyone doing a hundred a night would have abs by now.”

02 CORE MESSAGE

You can't pick where your body loses fat. Crunches make the muscles underneath stronger, and that's good, but they don't melt what's sitting on top.

Losing fat around your midsection comes from the full picture: how you eat, how much you move during the day, and training your whole body instead of one spot.

Core work is in every program I write. It's just never the whole plan.

Train your core for strength. Fix your plate and the rest of your week for the fat.

03 CALL TO ACTION

“DM me CORE. I'll send you my 10-minute midsection workout and the three things that actually move the needle.”

SCRIPT 3 OF 5

Your Weekends Are Erasing Your Weekdays

Talking Head · Mindset angle

FORMAT	LENGTH	CHANNEL	DM KEYWORD
Talking Head	30-40 sec	Instagram Reels	WEEKEND

01 THE HOOK

“Monday to Friday you're dialed in. Then Saturday and Sunday quietly undo most of it.”

02 CORE MESSAGE

Five good days feel like a win. But two loose days of brunch, drinks and whatever's in the fridge can cancel out a big part of your week, and most people never connect the two.

You don't need a perfect weekend. You need a plan before it starts: one meal out you actually enjoy, a walk or a short session on Saturday, and back to normal on Sunday night instead of Monday.

When someone tells me they're stuck, the first thing I ask about isn't their workouts. It's their weekends.

Win the weekend on purpose and the weekdays finally start adding up.

03 CALL TO ACTION

“DM me WEEKEND. I'll show you the weekend plan my clients use.”

SCRIPT 4 OF 5

If Stairs Bother Your Knees, Start Here

Educational · Authority angle

FORMAT	LENGTH	CHANNEL	DM KEYWORD
Educational	35-45 sec	Instagram Reels	KNEES

01 THE HOOK

“If taking the stairs makes your knees ache, your knees probably aren't the whole problem.”

02 CORE MESSAGE

A lot of knee discomfort comes from what's around the knee. Hips and legs that got weak from sitting all day, so the joint ends up taking the load the muscles should be handling.

Building strength in your glutes, quads and hamstrings, slowly and with good form, takes pressure off the knee instead of adding to it.

Some of the best progress I see doesn't show up on a scale. It's taking the stairs, getting up from the floor or playing with your kids without thinking about your knees. (If pain is sharp or ongoing, see your doctor first.)

Strong legs are how you protect your knees, not what hurts them.

03 CALL TO ACTION

“DM me KNEES. I'll send you the three movements we start with.”

SCRIPT 5 OF 5

How To Eat Out And Still Make Progress

Talking Head · Practical angle

FORMAT	LENGTH	CHANNEL	DM KEYWORD
Talking Head	35-45 sec	Instagram Reels	MENU

01 THE HOOK

“You don't have to stop eating out to get in shape. You just have to order like you have a plan.”

02 CORE MESSAGE

Work lunches, date night, the kids' games. For most adults, eating out a couple of times a week is just life, and cutting it out completely never lasts.

Three rules that work almost anywhere: build your order around a protein, swap one side for vegetables, and decide before you sit down if tonight is drinks or dessert.

I'd rather teach you how to handle a menu than hand you a diet you'll quit in three weeks.

Real life has restaurants in it. Your plan should too.

03 CALL TO ACTION

“DM me MENU. I'll send you my go-to orders for the places you already eat.”
